**PUBLICATION Link:** <https://www.lexonomy.eu/cyberspeak/>

**PUBLICATION YEAR - 2020**

**The Cyber-speak is an ongoing electronic lexicographic project that is based on the study of the late XX – early XXI century European languages vocabulary integral dynamics within the emergent computer technology framework.**

A methodology of computer vocabulary innovative elements phenomenological features identification is introduced supplying the template for a new study field – **phenomenological neology and neography.**

The study approach provides for the innovative computer logosphere definition and stock inventory in terms of its integrity as a macro-body of phenomenological and dynamic specificity. Computer logosphere macrostructure is the bulk of innovative vocabulary units as a reference system to cyberreality substantial dimensions.

Meaningful and formal boundaries, phenomenological and substantial features of innovative computer logosphere microstructure constituent – innovative computer terminos – are defined.

An inventory of innovative European computer logosphere microstructure constituents – EICT – static and dynamic qualities, featured through successive content levels, is shortlisted and used as lexicographic markers for the innovative cyber vocabulary semantic structures of different tiers.

## Substant elements of EICTs meaning hierarchy

Substant taxon	Substant unit	
	Substant hyperunit	Substant hypounit
SUBSTANCE TYPE :	<ul style="list-style-type: none"><li>-  COMPUTER BEING </li><li>-  SUBSTANCE QUALITY :</li><li>-  VIRTUALITY </li><li>-  NETWORK </li></ul>	<ul style="list-style-type: none"><li>-  TECHNOGENESIS </li><li>-  CYBERMORPHISM </li></ul>
SUBSTANCE AFFILIATION :	<ul style="list-style-type: none"><li>-  CB OBJECT </li><li>-  CB SUBJECT </li><li>-  CB SIMULACRUM </li></ul>	–
SUBSTANCE DURATION :	<ul style="list-style-type: none"><li>-  SPACE :</li><li>-  TIME :</li></ul>	<ul style="list-style-type: none"><li>-  SINGULARITY </li></ul>

SUBSTANCE FRACTURE :	-  SPACE  -  TIME :	-  ESCHATOLOGY
----------------------	------------------------	----------------

The EICT static and dynamic qualities provide for the volume, boundaries and content of innovative English computer logosphere micro- and macro-dynamics assessment. The guidelines of innovative European computer logosphere both internal and external microstructure dynamic mobility are delineated by the structural and content patterns, inherent to this linguistic body.

The logosphere under scrutiny macro- and micro-structures arrangement and dynamics are defined by the dissipative nature of its meaningful micro-components interconnectivity and substantial semantic elements upward mobility.
