

# Advances in Intelligent Systems and Computing

Volume 1131

## Series Editor

Janusz Kacprzyk, Systems Research Institute, Polish Academy of Sciences,  
Warsaw, Poland

## Advisory Editors

Nikhil R. Pal, Indian Statistical Institute, Kolkata, India

Rafael Bello Perez, Faculty of Mathematics, Physics and Computing,  
Universidad Central de Las Villas, Santa Clara, Cuba

Emilio S. Corchado, University of Salamanca, Salamanca, Spain

Hani Hagras, School of Computer Science and Electronic Engineering,  
University of Essex, Colchester, UK

László T. Kóczy, Department of Automation, Széchenyi István University,  
Gyor, Hungary

Vladik Kreinovich, Department of Computer Science, University of Texas  
at El Paso, El Paso, TX, USA

Chin-Teng Lin, Department of Electrical Engineering, National Chiao  
Tung University, Hsinchu, Taiwan

Jie Lu, Faculty of Engineering and Information Technology,  
University of Technology Sydney, Sydney, NSW, Australia

Patricia Melin, Graduate Program of Computer Science, Tijuana Institute  
of Technology, Tijuana, Mexico

Nadia Nedjah, Department of Electronics Engineering, University of Rio de Janeiro,  
Rio de Janeiro, Brazil

Ngoc Thanh Nguyen , Faculty of Computer Science and Management,  
Wrocław University of Technology, Wrocław, Poland

Jun Wang, Department of Mechanical and Automation Engineering,  
The Chinese University of Hong Kong, Shatin, Hong Kong

The series “Advances in Intelligent Systems and Computing” contains publications on theory, applications, and design methods of Intelligent Systems and Intelligent Computing. Virtually all disciplines such as engineering, natural sciences, computer and information science, ICT, economics, business, e-commerce, environment, healthcare, life science are covered. The list of topics spans all the areas of modern intelligent systems and computing such as: computational intelligence, soft computing including neural networks, fuzzy systems, evolutionary computing and the fusion of these paradigms, social intelligence, ambient intelligence, computational neuroscience, artificial life, virtual worlds and society, cognitive science and systems, Perception and Vision, DNA and immune based systems, self-organizing and adaptive systems, e-Learning and teaching, human-centered and human-centric computing, recommender systems, intelligent control, robotics and mechatronics including human-machine teaming, knowledge-based paradigms, learning paradigms, machine ethics, intelligent data analysis, knowledge management, intelligent agents, intelligent decision making and support, intelligent network security, trust management, interactive entertainment, Web intelligence and multimedia.

The publications within “Advances in Intelligent Systems and Computing” are primarily proceedings of important conferences, symposia and congresses. They cover significant recent developments in the field, both of a foundational and applicable character. An important characteristic feature of the series is the short publication time and world-wide distribution. This permits a rapid and broad dissemination of research results.

**\*\* Indexing: The books of this series are submitted to ISI Proceedings, EI-Compendex, DBLP, SCOPUS, Google Scholar and Springerlink \*\***

# Contents

<b>Automotive Design and Transportation Engineering</b>	
<b>User-Centered Design Within the Context of Automated Driving in Trucks – Guideline and Methods for Future Conceptualization of Automated Systems</b> . . . . .	3
Paula Laßmann, Florian Reichelt, Dominique Stimm, and Thomas Maier	
<b>Towards Probabilistic Analysis of Human-System Integration in Automated Driving</b> . . . . .	9
Ephraim Suhir, Gunther Paul, and Hermann Kaindl	
<b>Trust Provisioning in the Transport Infrastructure</b> . . . . .	15
Scott Cadzow	
<b>Drivers’ Interaction with, and Perception Toward Semi-autonomous Vehicles in Naturalistic Settings</b> . . . . .	20
Jisun Kim, Kirsten Revell, Pat Langdon, Mike Bradley, Ioannis Politis, Simon Thompson, Lee Skrypchuk, Jim O-Donoghue, Joy Richardson, Jed Clark, Aaron Roberts, Alex Mouzakitis, and Neville A. Stanton	
<b>Are Autonomous Vehicles the Solution to Drowsy Driving?</b> . . . . .	27
Daniel Grunstein and Ron Grunstein	
<b>Exploring New Concepts to Create Natural and Trustful Dialogue Between Humans and Intelligent Autonomous Vehicles</b> . . . . .	34
Andrea Di Salvo and Andrea Arcoraci	
<b>Integrating Human Acceptable Morality in Autonomous Vehicles</b> . . . . .	41
Giorgio M. Grasso, Chiara Lucifora, Pietro Perconti, and Alessio Plebe	
<b>The Future of User Experience Design in the Interior of Autonomous Car Driven by AI</b> . . . . .	46
Laura Giraldi	

<b>Measuring Driver Discomfort in Autonomous Vehicles</b> .....	52
Dario Niermann and Andreas Lüdtké	
<b>Human-Centered Design for Automotive Styling Design: Conceptualizing a Car from QFD to ViP</b> .....	59
Gian Andrea Giacobone and Giuseppe Mincoelli	
<b>Enriching the User Experience of a Connected Car with Quantified Self</b> .....	66
Maurizio Caon, Marc Demierre, Omar Abou Khaled, Elena Mugellini, and Pierre Delaigue	
<b>Constructing a Mental Model of Automation Levels in the Area of Vehicle Guidance</b> .....	73
Larissa Zacherl, Jonas Radlmayr, and Klaus Bengler	
<b>Effect of Phone Interface Modality on Drivers' Task Load Index in Conventional and Semi-Automated Vehicles</b> .....	80
Kristina Davtyan and Francesca Favaro	
<b>Software Failure Mode and Effects Analysis</b> .....	86
Palak Talwar	
<b>A Validated Failure Behavior Model for Driver Behavior Models for Generating Skid-Scenarios on Motorways</b> .....	92
Bernd Huber, Paul Schmidl, Christoph Sippl, and Anatoli Djanatliev	
<b>Human-Machine Interface Research of Autonomous Vehicles Based on Cognitive Work Analysis Framework</b> .....	99
Chi Zhang, Goudong Yin, and Zheng Wu	
<b>Mercury: A Vision-Based Framework for Driver Monitoring</b> .....	104
Guido Borghi, Stefano Pini, Roberto Vezzani, and Rita Cucchiara	
<b>Investigating the Impact of Time-Lagged End-to-End Control in Autonomous Driving</b> .....	111
Haruna Asai, Yoshihiro Hashimoto, and Giuseppe Lisi	
<b>The Car as a Transformer</b> .....	118
Jeremy Aston and Rui Pedro Freire	
<b>Unmanned Small Shared Electric Vehicle</b> .....	124
Binhong Zhai, Guodong Yin, and Zhen Wu	
<b>A Forward Train Detection Method Based on Convolutional Neural Network</b> .....	129
Zhangyu Wang, Tony Lee, Michael Leung, Simon Tang, Qiang Zhang, Zining Yang, and Virginia Cheung	

**Styling Research of DFAC-6851H4E City Bus Based on Fuzzy Evaluation** . . . . . 136  
 Huajie Wang and Jianxin Cheng

**Object Detection to Evaluate Image-to-Image Translation on Different Road Conditions** . . . . . 143  
 Fumiya Sudo, Yoshihiro Hashimoto, and Giuseppe Lisi

**Humans and Artificial Cognitive Systems**

**Modelling Proxemics for Human-Technology-Interaction in Decentralized Social-Robot-Systems** . . . . . 153  
 Thomas Kirks, Jana Jost, Jan Finke, and Sebastian Hoose

**Category Learning as a Use Case for Anticipating Individual Human Decision Making by Intelligent Systems** . . . . . 159  
 Marcel Lommerzheim, Sabine Prezenski, Nele Russwinkel, and André Brechmann

**System Architecture of a Human Biosensing and Monitoring Suite with Adaptive Task Allocation** . . . . . 165  
 Brandon Cuffie and Lucas Stephane

**The Role of Artificial Intelligence in Contemporary Medicine** . . . . . 172  
 Larisa Hambarzumyan, Viktoria Ter-Sargisova, and Aleksandr Baghramyam

**Improving Policy-Capturing with Active Learning for Real-Time Decision Support** . . . . . 177  
 Bénédicte Chatelais, Daniel Lafond, Alexandre Hains, and Christian Gagné

**Task Measures for Air Traffic Display Operations** . . . . . 183  
 Shi Yin Tan, Chun Hsien Chen, Sun Woh Lye, and Fan Li

**Identifying People Based on Machine Learning Classification of Foods Consumed in Order to Offer Tailored Healthier Food Options** . . . . . 190  
 Jenna Kim, Shuhao Lin, Giannina Ferrara, Jenna Hua, and Edmund Seto

**On the Perception of Disharmony** . . . . . 195  
 Stijn Verwulgen, Thomas Peeters, Sander Van Goethem, and Sofia Scataglini

**Mobile Real-Time Eye-Tracking for Gaze-Aware Security Surveillance Support Systems** . . . . . 201  
 Alexandre Marois, Daniel Lafond, François Vachon, Eric R. Harvey, Bruno Martin, and Sébastien Tremblay

**Detecting Impulsive Behavior Through Agent-Based Games** ..... 208  
Alia El Bolock, Ahmed Ghonaim, Cornelia Herbert,  
and Slim Abdennadher

**Visual and Motor Capabilities of Future Car Drivers** ..... 214  
Ferdinando Tripi, Rita Toni, Angela Lucia Calogero,  
Pasqualino Maietta Latessa, Antonio Tempesta, Stefania Toselli,  
Alessia Grigoletto, Davide Varotti, Francesco Campa, Luigi Manzoni,  
and Alberto Vergnano

**A Fixation-Click Count Signature as a Visual Monitoring  
Enhancement Feature for Air Traffic Controllers** ..... 221  
Hong Jie Wee, Sun Woh Lye, and Jean-Philippe Pinheiro

**Digital Transformation in Product Service System for Kids.  
Design Tools for Emerging Needs** ..... 228  
Benedetta Terenzi and Arianna Vignati

**A Novel Heuristic Mechanism to Formalize Online Behavior  
Through Search Engine Credibility** ..... 235  
Debora Di Caprio and Francisco J. Santos-Arteaga

**Caterina, Alexa and the Others** ..... 241  
Elisabetta Benelli and Jurji Filieri

**Event-Related Potential Study on Military Icon Based  
on Composition-Semantic Relationship** ..... 248  
Xian Li, Haiyan Wang, and Junkai Shao

**Ekybot: Framework Proposal for Chatbot in Financial Enterprises** ... 254  
Maritzol Tenemaza, Sergio Luján-Mora, Angélica de Antonio,  
Jaime Ramírez, and Omar Zarabia

**Alpha and Beta EEG Desynchronizations Anticipate Steering Actions  
in a Driving Simulation Experiment** ..... 260  
Giovanni Vecchiato, Maria Del Vecchio, Sergey Antopolskiy,  
Andrea Bellotti, Alessia Colucciello, Anna Marchenkova,  
Jonas Ambeck-Madsen, Luca Ascari, and Pietro Avanzini

**The Quantitative Evaluation of Permanent Disability in Forensic  
Medicine Through Stereo Photogrammetric Technology** ..... 266  
Claudia Trignano, Andrea Castelli, Vittorio Dell’Orfano,  
and Elena Mazzeo

**A Unified Framework for Symbol Grounding  
in Human-Machine Interactions** ..... 271  
Dingzhou Fei

**Improving Machine Translation Output of German Compound and Multiword Financial Terms** ..... 276  
 Christina Valavani, Christina Alexandris, and George Mikros

**Self-adjusted Data-Driven System for Prediction of Human Performance** ..... 282  
 Oleksandr Burov, Evgeniy Lavrov, Nadiia Pasko, Olena Hlazunova, Olga Lavrova, Vasyl Kyzenko, and Yana Dolgikh

**Human Factor and Cognitive Methods in the Design of Products and Production Systems of Mechanical Engineering in the Framework of NBIC Convergence** ..... 288  
 Evgeny Kolbachev, Elena Sidorova, and Polina Vaneeva

**Automatic Assessment System of Operators’ Risk in Order Picking Process for Task Analysis** ..... 294  
 Yangxu Li, Bach Q. Ho, Tatsunori Hara, and Jun Ota

**TARS Mobile App with Deep Fingertip Detector for the Visually Impaired** ..... 301  
 Tetsushi Miwa, Youichi Hosokawa, Yoshihiro Hashimoto, and Giuseppe Lisi

**Analysis Process of Exploratory Research Represented in a Coordinate System XYZ** ..... 307  
 Olga Popova, Boris Popov, Vladimir Karandey, and Vladimir Afanasyev

**A Variety of Visual-Speech Matching ERP Studies in Quiet-Noise Scenarios** ..... 313  
 Lingling Hu, Chengqi Xue, and Junkai Shao

**Research on Color Stratification in Dynamic Environment: Frequency Domain Analysis of Delta, SMR and Theta EEG Rhythms** ..... 319  
 Cheng Guan, Lei Zhou, Tongtong Zhang, and Xiang Zeng

**Human AI Symbiosis: The Role of Artificial Intelligence in Stratifying High-Risk Outpatient Senior Citizen Fall Events in a Non-connected Environments** ..... 325  
 Chandrasekar Vuppapalapati, Anitha Ilapakurti, Sharat Kedari, Rajasekar Vuppapalapati, Jayashankar Vuppapalapati, and Santosh Kedari

**Intelligence, Technology and Analytics**

**Distinguishing a Human or Machine Cyberattacker** ..... 335  
 Wayne Patterson, Acklyn Murray, and Lorraine Fleming

**Using Eye Tracking to Assess User Behavior in Virtual Training** ..... 341  
 Mina Fahimipirehgalin, Frieder Loch, and Birgit Vogel-Heuser

<b>Democratization of AI to Small Scale Farmers, Albeit Food Harvesting Citizen Data Scientists, that Are at the Bottom of the Economic Pyramid . . . . .</b>	<b>348</b>
Chandrasekar Vuppalapati, Anitha Ilapakurti, Sharat Kedari, Rajasekar Vuppalapati, Jayashankar Vuppalapati, and Santosh Kedari	
<b>Cybersecurity in Educational Networks . . . . .</b>	<b>359</b>
Oleksandr Burov, Svitlana Lytvynova, Evgeniy Lavrov, Yuliya Krylova-Grek, Olena Orliyk, Sergiy Petrenko, Svitlana Shevchenko, and Oleksii M. Tkachenko	
<b>The Problem of Tracking the Center of Attention in Eye Tracking Systems . . . . .</b>	<b>365</b>
Marina Boronenko, Vladimir Zelensky, Oksana Isaeva, and Elizaveta Kiseleva	
<b>Health Risk Assessment Matrix for Back Pain Prediction Among Call Center Workers . . . . .</b>	<b>372</b>
Sunisa Chaiklieng and Pornnapa Suggaravetsiri	
<b>Towards Conceptual New Product Development Framework for Latvian ICT Sector Companies and Startups . . . . .</b>	<b>379</b>
Didzis Rutitis and Tatjana Volkova	
<b>A Liveness Detection Method for Palmprint Authentication . . . . .</b>	<b>385</b>
Ayaka Sugimoto, Yuya Shiomi, Akira Baba, Norihiro Okui, Tetushi Ohki, Yutaka Miyake, and Masakatsu Nishigaki	
<b>Procedure for the Implementation of the Manufacturing Module of an ERP System in MSME. Applied Case: Textile “Tendencias” Enterprise, UDA ERP . . . . .</b>	<b>392</b>
Pedro Mogrovejo, Juan Manuel Maldonado-Maldonado, Esteban Crespo-Martínez, and Catalina Astudillo	
<b>Model of Emotionally Stained Pupillogram Plot . . . . .</b>	<b>398</b>
Marina Boronenko, Yurii Boronenko, Oksana Isaeva, and Elizaveta Kiseleva	
<b>Cost-Informed Water Decision-Making Technology for Smarter Farming . . . . .</b>	<b>404</b>
Joanne Tingey-Holyoak, John Dean Pisaniello, Peter Buss, and Ben Wiersma	
<b>A Review on the Role of Embodiment in Improving Human-Vehicle Interaction: A Proposal for Further Development of Embodied Intelligence . . . . .</b>	<b>409</b>
Hamid Naghdbishi and Alireza Ajdari	

**Analysis of Topological Relationships of Human** ..... 415  
 Jia Zhou, Xuebo Chen, and Zhigang Li

**Impact of Technological Innovation on the Productivity of Manufacturing Companies in Peru** ..... 421  
 Julio César Ortíz Berrú, Cristhian Aldana Yarlequé, and Lucio Leo Verástegui Huanca

**Parametric Urban Design** ..... 427  
 Rongrong Gu and Wuzhong Zhou

**Narrative Review of the Role of Wearable Devices in Promoting Health Behavior: Based on Health Belief Model** ..... 433  
 Dingzhou Fei and Xia Wang

**Competitiveness of Higher Education System as a Sector of Economy: Conceptual Model of Analysis with Application to Ukraine** ..... 439  
 Olha Hrynkevych, Oleg Sorochak, Olena Panukhnyk, Nazariy Popadynets, Rostyslav Bilyk, Iryna Khymych, and Yazina Viktoriia

**Application of Classification Algorithms in the Generation of a Network Intrusion Detection Model Using the KDDCUP99 Database** ..... 446  
 Jairo Hidalgo and Marco Yandún

**Vulnerability Discovery in Network Systems Based on Human-Machine Collective Intelligence** ..... 453  
 Ye Han, Jianfeng Chen, Zhihong Rao, Yifan Wang, and Jie Liu

**Computational Modeling and Simulation**

**Supporting Decisions in Production Line Processes by Combining Process Mining and System Dynamics** ..... 461  
 Mahsa Pourbafrani, Sebastiaan J. van Zelst, and Wil M. P. van der Aalst

**Using Real Sensors Data to Calibrate a Traffic Model for the City of Modena** ..... 468  
 Chiara Bachechi, Federica Rollo, Federico Desimoni, and Laura Po

**Logistic Regression for Criteria Weight Elicitation in PROMETHEE-Based Ranking Methods** ..... 474  
 Elia Balugani, Francesco Lolli, Maria Angela Butturi, Alessio Ishizaka, and Miguel Afonso Sellitto

**3D CAD Design of Jewelry Accessories, Determination of Geometrical Features and Characteristics of the Used Material of Precious Metals** ..... 480  
 Tihomir Dovramadjiev, Mariana Stoeva, Violeta Bozhikova, and Rozalina Dimova

<b>Discovering and Mapping LMS Course Usage Patterns to Learning Outcomes</b> .....	486
Darko Etinger	
<b>Drug Recommendation System for Geriatric Patients Based on Bayesian Networks and Evolutionary Computation</b> .....	492
Lourdes Montalvo and Edwin Villanueva	
<b>Software for the Determination of the Time and the F Value in the Thermal Processing of Packaged Foods Using the Modified Ball Method</b> .....	498
William Rolando Miranda Zamora, Manuel Jesus Sanchez Chero, and Jose Antonio Sanchez Chero	
<b>Communication Protocol Between Humans and Bank Server Secure Against Man-in-the-Browser Attacks</b> .....	503
Koki Mukaihira, Yasuyoshi Jinno, Takashi Tsuchiya, Tetsushi Ohki, Kenta Takahashi, Wakaha Ogata, and Masakatsu Nishigaki	
<b>Development of a Solution Model for Timetabling Problems Through a Binary Integer Linear Programming Approach</b> .....	510
Juan Manuel Maldonado-Matute, María José González Calle, and Rosana María Celi Costa	
<b>Machine, Discourse and Power: From Machine Learning in Construction of 3D Face to Art and Creativity</b> .....	517
Man Lai-man Tin	
<b>Modelling Alzheimer’s People Brain Using Augmented Reality for Medical Diagnosis Analysis</b> .....	524
Ramalakshmi Ramar, Swashi Muthammal, Tamilselvi Dhamodharan, and Gopi Krishnan Rajendran	
<b>Software Vulnerability Mining Based on the Human-Computer Coordination</b> .....	532
Jie Liu, Da He, Yifan Wang, Jianfeng Chen, and Zhihong Rao	
<b>Design and Verification Method for Flammable Fluid Drainage of Civil Aircraft Based on DMU</b> .....	539
Yu Chen	
<b>Low-Income Dwelling Bioclimatic Design with CAD Technologies. A Case Study in Monte Sinahí, Ecuador</b> .....	546
Jesús Rafael Hechavarría Hernández, Boris Forero, Robinson Vega Jaramillo, Katherine Naranjo, Fernanda Sánchez, Billy Soto, and Félix Jaramillo	

**Virtual Reduction and Interaction of Chinese Traditional Furniture and Its Usage Scenarios** ..... 552  
Dehua Yu

**Humans and Artificial Systems Complexity**

**Your Voice Assistant Will See You Now: Reducing Complexity in Human and Artificial System Collaboration Using Voice as an Operating System** ..... 561  
Viraj Patwardhan, Neil Gomes, and Maia Ottenstein

**Pre-emptive Culture Mapping: Exploring a System of Language to Better Understand the Abstract Traits of Human Interaction** ..... 567  
Timothy J. Stock and Marie Lena Tupot

**"Meanings" Based Human Centered Design of Systems** ..... 573  
Santosh Basapur and Keiichi Sato

**A Systematic Review of Sociotechnical System Methods Between 1951 and 2019** ..... 580  
Amangul A. Imanghaliyeva

**Designing a Safety Confirmation System that Utilizes Human Behavior in Disaster Situations** ..... 588  
Masayuki Ihara, Hiroshi Nakajima, Goro Inomae, and Hiroshi Watanabe

**Designing Ethical AI in the Shadow of Hume’s Guillotine** ..... 594  
Pertti Saariluoma and Jaana Leikas

**A Counterattack of Misinformation: How the Information Influence to Human Being** ..... 600  
Subin Lee and Ken Nah

**Effects of Increased Cognitive Load on Field of View in Multi-task Operations Involving Surveillance** ..... 605  
Seng Yuen Marcus Goh, Ka Lon Sou, Sun Woh Lye, and Hong Xu

**Investigating Human Factors in the Hand-Held Gaming Interface of a Telerehabilitation Robotic System** ..... 612  
S. M. Mizanoor Rahman

**Procedure of Mining Relevant Examples of Armed Conflicts to Define Plausibility Based on Numerical Assessment of Similarity of Situations and Developments** ..... 619  
Ahto Kuuseok

**Human Digital Twins: Two-Layer Machine Learning Architecture for Intelligent Human-Machine Collaboration** ..... 627  
Wael Hafez

**Semantic Network Analysis of Korean Virtual Assistants’ Review Data** . . . . . 633  
Hyewon Lim, Xu Li, Harim Yeo, and Hyesun Hwang

**Design Collaboration Mode of Man–Computer Symbiosis in the Age of Intelligence** . . . . . 640  
Jinjing Liu and Ken Nah

**User Experience over Time with Personal Assistants of Mobile Banking Application in Turkey** . . . . . 646  
Hatice Merve Demirci and Mehmet Berberoğlu

**Human-Automation Interaction Through Shared and Traded Control Applications** . . . . . 653  
Mauricio Marcano, Sergio Díaz, Joshue Pérez, Andrea Castellano, Elisa Landini, Fabio Tango, and Paolo Burgio

**Alignment of Management by Processes and Quality Tools and Lean to Reduce Unfilled Orders of Fabrics for Export: A Case Study** . . . . . 660  
Z. Bardales, P. Tito, F. Maradiegue, Carlos Raymundo-Ibañez, and Luis Rivera

**Detection and Prevention of Criminal Attacks in Cloud Computing Using a Hybrid Intrusion Detection Systems** . . . . . 667  
Thierry Nsabimana, Christian Ildegard Bimenyimana, Victor Odumuyiwa, and Joël Toyigbé Hounsou

**Development of Tutoring Assistance Framework Using Machine Learning Technology for Teachers** . . . . . 677  
Satoshi Togawa, Akiko Kondo, and Kazuhide Kanenishi

**Replenishment System Using Inventory Models with Continuous Review and Quantitative Forecasting to Reduce Stock-Outs in a Commercial Company** . . . . . 683  
Carlos Malca-Ramirez, Luis Nuñez-Salome, Ernesto Altamirano, and José Alvarez-Merino

**Applying SLP in a Lean Manufacturing Model to Improve Productivity of Furniture SME** . . . . . 690  
Zhelenn Farfan-Quintanilla, Manuel Caira-Jimenez, Fernando Sotelo-Raffo, Carlos Raymundo-Ibañez, and Moises Perez

**Collaborative Model Based on ARIMA Forecasting for Reducing Inventory Costs at Footwear SMEs** . . . . . 697  
Alejandra Angulo-Baca, Michael Bernal-Bazalar, Juan Sotelo-Raffo, Carlos Raymundo-Ibañez, and Moises Perez

**A Framework of Quality Control Matrix in Paprika Chain Value: An Empirical Investigation in Peru** ..... 704  
 Diana Garcia-Montero, Luz Roman-Ramirez, Fernando Sotelo-Raffo, and Edgar Ramos-Palomino

**Inventory Optimization Model Applying the Holt-Winters Method to Improve Stock Levels in SMEs in the Sports Retail Sector** ..... 711  
 Diego Amasifén-Pacheco, Angela Garay-Osorio, Maribel Perez-Paredes, Carlos Raymundo-Ibañez, and Luis Rivera

**Recruitment and Training Model for Retaining and Improving the Reputation of Medical Specialists to Increase Revenue of a Private Healthcare SME** ..... 719  
 Audy Castro-Blancas, Carlos Rivas-Zavaleta, Carlos Cespedes-Blanco, Carlos Raymundo, and Luis Rivera

**Research on Disabled People’s Museum Visit Experience from the Perspective of Actor-Network Theory** ..... 726  
 Shifeng Zhao and Jie Shen

**Production Management Model to Balance Assembly Lines Focused on Worker Autonomy to Increase the Efficiency of Garment Manufacturing** ..... 733  
 Valeria Sosa-Perez, Jose Palomino-Moya, Claudia Leon-Chavarril, Carlos Raymundo-Ibañez, and Moises Perez

**Rural Ecotourism Associative Model to Optimize the Development of the High Andean Tourism Sector in Peru** ..... 740  
 Oscar Galvez-Acevedo, Jose Martinez-Castañon, Mercedes Cano-Lazarte, Carlos Raymundo-Ibañez, and Moises Perez

**Picking Management Model with a Focus on Change Management to Reduce the Deterioration of Finished Products in Mass Consumption Distribution Centers** ..... 746  
 Lourdes Canales-Ramos, Arelis Velasquez-Vargas, Pedro Chavez-Soriano, Carlos Raymundo-Ibañez, and Moises Perez

**Risk Factors Associated with Work-Related Low Back Pain Among Home-Based Garment Workers** ..... 753  
 Sunisa Chaiklieng, Pornnapa Suggaravetsiri, and Sari Andajani

**Demand Management Model Based on Quantitative Forecasting Methods and Continuous Improvement to Increase Production Planning Efficiencies of SMEs Bakeries** ..... 760  
 Denilson Contreras-Choccata, Juan Sotelo-Raffo, Carlos Raymundo-Ibañez, and Luis Rivera

<b>Study on Key Elements of Shopping App Design for the Elderly . . . . .</b>	<b>766</b>
Wenfeng Liu, Fenghong Wang, and Yiyen Chen	
<b>Shopping Website Accessibility Study Based on Users' Mental Models . . . . .</b>	<b>773</b>
Zhen Wu, Chengqi Xue, Yanfei Zhu, Binhong Zhai, and Chi Zhang	
<b>HIRAC-Based Risk Management Model with POKA-YOKE and TPM Continuity to Control and Mitigate Emergency Scenarios in Hydrocarbon Sector Operations . . . . .</b>	<b>780</b>
Jose Echevarria-Cahuas, Maria Quispe-Huapaya, Cesar Ramirez-Valdivia, Carlos Raymundo, and Luis Rivera	
<b>Materials and Inclusive Human Systems</b>	
<b>CAD-Based Risk Assessment Approach for Safe Scheduling of HRC Operations for Parts Produced by Laser Powder Bed Fusion . . . . .</b>	<b>789</b>
Fabio Pini, Enrico Dalpadulo, and Francesco Leali	
<b>Photogrammetry and Additive Manufacturing Based Methodology for Decentralized Spare Part Production in Automotive Industry . . . . .</b>	<b>796</b>
Antonio Bacciaglia, Alessandro Ceruti, and Alfredo Liverani	
<b>Improved Heat Sink for Thermoelectric Energy Harvesting Systems . . .</b>	<b>803</b>
Alessandro Bertacchini, Silvia Barbi, and Monia Montorsi	
<b>A Framework Designing for Story Sharing of the Elderly: From Design Opportunities to Concept Selection . . . . .</b>	<b>810</b>
Cun Li, Jun Hu, Bart Hengeveld, and Caroline Hummels	
<b>A Methodological Approach for the Design of Inclusive Assistive Devices by Integrating Co-design and Additive Manufacturing Technologies . . . . .</b>	<b>816</b>
Francesco Gherardini, Andrea Petruccioli, Enrico Dalpadulo, Valentina Bettelli, Maria Teresa Mascia, and Francesco Leali	
<b>New Collaborative Version of the Quality Function Deployment: Practical Application to the HABITAT Project . . . . .</b>	<b>823</b>
Giuseppe Mincolessi, Gian Andrea Giacobone, Michele Marchi, and Silvia Imbesi	
<b>Human Centered Methodologies for the Development of Multidisciplinary Design Research in the Field of IOT Systems: Project Habitat and Pleinair . . . . .</b>	<b>829</b>
Giuseppe Mincolessi, Silvia Imbesi, Gian Andrea Giacobone, and Michele Marchi	

**Design of an Innovative Furniture System: Improving Acoustic Comfort in Coworking Workplaces** ..... 835  
Viola Geniola, Stefania Camplone, Antonio Marano, and Emilio Rossi

**Modeling of Subcutaneous Implantable Microchip Intention of Use** ... 842  
Mona A. Mohamed

**A Brief Analysis of the Status Quo and Trend of Wearable Smart Jewellery Devices Design** ..... 848  
Jing Liu and Ken Nah

**Accessibility Evaluation of Video Games for Users with Cognitive Disabilities** ..... 853  
Luis Salvador-Ullauri, Patricia Acosta-Vargas, and Sergio Luján-Mora

**Design of Smart Devices for Older People: A User Centered Approach for the Collection of Users’ Needs** ..... 860  
Silvia Imbesi and Giuseppe Mincoelli

**Examining Feedback of Apple Watch Users in Korea Using Textmining Analysis** ..... 865  
Yu Lim Lee, Minji Jung, In-Hyoun Park, Ahyoung Kim, and Jae-Eun Chung

**Structural Testing of Laminated Prosthetic Sockets: Comparison of Philippine Pineapple Fabric and Fiberglass** ..... 871  
Glenn Alkuino, Ervin Fandialan, and Marvin Medina

**Challenges and Improvements in Website Accessibility for Health Services** ..... 875  
Patricia Acosta-Vargas, Paula Hidalgo, Gloria Acosta-Vargas, Mario Gonzalez, Javier Guña-Moya, and Belén Salvador-Acosta

**Providing Comprehensive Navigational Cues Through the Driving Seat to Reduce Visual Distraction in Current Generation of Semi-autonomous Vehicles** ..... 882  
Ahmed Farooq, Grigori Evreinov, and Roope Raisamo

**Ensuring the Sustainability of Inclusive Projects Through Strategic Addressing Supported by Process Management: Case Applied to Aquamarinna Handmade Soap** ..... 889  
Diego S. Suarez, Esteban Crespo-Martínez, and Pedro Mogrovejo

**A New Model to Bionic Hand Prosthesis with Individual Fingers Actuators** ..... 896  
Marcelo H. Stoppa, Guilherme F. Neto, and Danillo A. de S. Dunck

**A Predictive Model of Users’ Behavior and Values of Smart Energy Meters Using PLS-SEM** ..... 903  
Ahmed Shuhaiber

**Abstract.** The paper discusses the possible impact of digital space on a human, as well as human-related directions in cyber-security analysis in the education: levels of cyber-security, social engineering role in cyber-security of education, “cognitive vaccination”. “A Human” is considered in general meaning, mainly as a learner. The analysis is provided on the basis of experience of hybrid war in Ukraine that have demonstrated the change of the target of military operations from military personnel and critical infrastructure to a human in general. Young people are the vulnerable group that can be the main goal of cognitive operations in long-term perspective, and they are the weakest link of the System.

**Keywords:** Cyber-security · Cognitive performance · Education · Social engineering

## 1 Introduction

A constantly increasing number of cybersecurity-related publications demonstrates a growing comprehension of this complex challenge facing the Globe and the necessity to consider wider spectrum of issues. Unfortunately, technical and informational solutions cannot satisfy humans’ safety and security of life and activity. Since it is an on-going process, specialists in this field are lack of current information and feel the need to change the training programs of cybersecurity (CS) that should focus “on the social, economic, and behavioral aspects of cyberspace, which are largely missing from the general discourse on cybersecurity” [1, p. 2]. First of all, new training programs should take into account the human features and a person’s functional state as well as

cognitive resilience due to the increasing role of cognitive warfare [2]. The cognitive war must deserve particular attention as its primary goal is not a prompt military operation and fight for territorial or economic resources, but it is a battle for people [3] aimed at affecting public opinion, radicalizing young people, infiltrating and corrupting enemy's information systems. Since the information in the global network exists out of space and time, the Net itself becomes an active human influencer [4], especially in social networks [5].

One of the human dimensions of extensive change involves the transition from producing predominantly material issues to intellectual ones and alterations in competitive target resources. Intellectual capital (first of all, human capital includes abilities, talents, knowledge, ideas, etc.) is becoming the most in-demand resource and the target of diverse cyber-attacks [6]. At present, digital networks are taking more and more crucial place in our everyday routine. Therefore, interventions to these networks pose a real threat to both humans and the state. By saying "humans" we don't mean just military (including cyber-)specialists, but everybody, since the cyberspace is a worldwide electronic medium facilitating social interaction. Undoubtedly, transformations in the forms, methods, and means of education are related to and accompanied by changes in learners' behavior by transition from traditional classroom education to network activities with unproductive consequences of the information received and its safety. However, at the same time, a human is still the weakest link in cybersecurity systems [7].

*Purpose.* To analyze potential hazards associated with learners' participation in online activities in digital education.

## 2 Method

Considering learning as a type of activity in human-system integration, today's learner may be viewed as an operator-researcher who acts in the digital environment. Successful learning involves mutual adaptation between a human and activity tools [8] using individual cognitive abilities measurement [9, 10]. On the other hand, it is possible to use ergonomics' methods and techniques to assess a learner's safety in the education system.

## 3 Results and Discussion

The core directions of cybersecurity analysis in the education field should be focused on the following issues: CS levels, role of social engineering in providing CS in education, and so-called "cognitive vaccination".

**Cyber Security Levels.** The paper deliberates about the problems of learners' cybersecurity in the educational process. It emphasizes the fact that the given problems are not limited to the technical aspects of protecting information resources, which must include such types of protection as legal, technical, informational, organizational, and psychological ones [4, 11].

The *legal* maintenance covers (but not limited) [12]:

- National and international legislation in the field of cybersecurity.
- Appropriate international legal agreements, conventions, and standards.
- Intellectual property rights.
- Protection of computer programs and databases [13].
- Personal data protection.
- Legal support of victims of cyber-attacks and expert opinions on the results of the computer-technical examinations.
- Legal support of a human right to know and get access to verified information (a person's education and development cannot be achieved without realizing self-concept).
- Legal literacy for young people regarding actions in digital networks.

Cybersecurity *technical* aspects imply the security of diverse technical means and tools (computers, networks, databases, information resources, etc.).

*Information* tools can be categorized according to the tasks solved by the users [11, p. 321]: Protection/Remedies, Awareness, Content, Learning to use, Security, Lifespan, Avoiding threats.

*Organizational* tools for solving cybersecurity issues comprise Awareness, Learning the cybersecurity culture, CS professional staff and the general population, Creation of CS special means, Distribution of CS facilities, Control of use.

*Psychological* means can be grouped depending on the personal and interpersonal level: National, Public, Group, Individual, Cultural, Cognitive, Intellectual, Habits.

Among the psychological tools aimed at achieving cybersecurity, the cognitive ones are the most vital. Recent cybersecurity research shows that information technology tools in this field are constantly being refined and hacker attacks become more human-centered [14]. This is extremely important because of the urgency of personal safety and the results of its activities. As shown in [4], the common accessibility of the information space leads induces that a person becomes a target of other participants' activity, while working in the information environment. Harmful activities force a person to read or to respond to the "wrong" information or to make other mistakes that leave his/her system vulnerable to cyber attacks, information leakage, etc.

These days, not only huge corporations or governing bodies are usual targets of cyber attacks, ordinary people, especially children and young adults, suffer from them as well. Their cognitive sphere is the most vulnerable (weak) link in the person-technology network [7], in particular, due to the extending usage of group work (project-oriented activity). In this regard, it is reasonable to exploit the operators' experience of preventing against cyber threats in the education field [15], accounting that in anthropocentric networks, which make up an ever-increasing share among common networks, the network itself acquires new properties, acting as an independent component (in addition to such factors as the network unit, interface, and links) acting beyond time and space [6].

***Role of Social Engineering in Providing CS in Education.*** The spectrum of hazards from the open cyberspace is continuously expanding. If ten years ago, the hazards for schoolchildren could be reduced to a relatively small number of groups (viral attacks,

cybercrime, the hazards of Internet surfing), then the diversity of hazards and threats is increasing over time, affecting all possible human activities online [11]. Threats coming from networks can be divided into the following types: active and passive, open and hidden, current and delayed [11, p. 309]. The greatest danger to students is hidden hazards of the Internet and especially the social engineering methods [16, 17].

The shift of cybercrime goals from technical (information) objects to the human link led to the emergence of social engineering (SE) as methods and technologies for obtaining the necessary access to information based on the characteristics of human psychology. Social engineers, for instance, use fear, interest or trust to manipulate, to change the behavior or perception of others. Sad to say, nowadays everybody can master the art of gaining access to computer systems or personal data [18]. Yet it is possible to resist SE impact if to follow nine recommendations:

- User credentials are the school property.
- Conduct introductory and regular training sessions for staff and students to increase information security skills.
- It is mandatory to have safety regulations and instructions that the user must always have access to.
- Users' computers must always have up-to-date antivirus software and firewall installed.
- Systems of detection and prevention of attacks should be used in any corporate network. Confidential information leakage prevention systems should be employed as well.
- It is necessary to restrict users with administrative privileges for operating systems and applications as much as possible.
- You need to be vigilant about the source requiring sensitive information.
- You should never open the contents of applications or follow the link without examining all the details and your own experience.
- It is also important to be critical of the messages received: how plausible can the information be?
- It is recommended to report such dangers to other family members, first of all, the elderly, who have no experience of using electronic means and are not aware of SE issues.

We believe that psycholinguistic tools could be useful to recognize SE interference and the ways to affect human cognition and safety, especially the cognitive weapon (mass-media, politicians' impact, textbooks, etc.) [19]. If a person knows, realizes and is aware of these tools, he/she can obviously resist them, which is the most effective way of providing cybersecurity.

**“Cognitive Vaccination”.** In 2002, UN General Assembly adopted resolution 57/239 “Elements to Create a Global Cybersecurity Culture” [20] to identify nine fundamental complementary elements of the global cybersecurity culture, including awareness; responsibility; response; ethics; democracy; risk assessment; design and implementation of security measures; security management; reevaluation.

The Resolution and cybersecurity elements relate to five levels of CS mentioned above. At the same time, it can be noted that psychological means (which relate directly

to each person separately) involve only behavioral aspects, i.e. responsibility and ethics; in other words, it is a manifestation of the social attitude to cybersecurity expressed by a person, who is considered as a relatively passive element of the cybersecurity system. Moreover, since no means guarantee 100% of human protection, it is advisable to determine the range of individual abilities to produce personal protection, except for the above.

The analysis of the curriculum and training programs implemented in pedagogical educational institutions has demonstrated that traditional education does not pay enough attention to the development of students' critical thinking skills related to the use of the Internet.

We propose to introduce "cyber vaccination" as part of the cybersecurity-related training. It can increase the human's safety level by a wide array of means: to accept rules for safe and responsible use of the Internet, to improve critical thinking skills, to train the participants of the network activity and to inform them about possible impact of the cyber environment, to model and to simulate cyber threats in relatively closed systems such as corporate and educational ones, to teach how to confront with the cyber threats for gaining the practical experience of behaving and restoring after cyber vulnerabilities, including assessing the person's current state and necessary adjustments to optimize his/her cognitive workability, and cyber survival trainings aimed at recognizing the threat or possible dangerous action in the network and the rational psychological and behavioral compensation for this action.

## 4 Conclusion

The analyzed features of teaching and learning in contemporary digital environment and recommendations could be an influential tool to improve the security and safety of educational process by adapting students' activity depending on his/her cognitive state in digital education, by designing intelligent individual-oriented systems and services that ameliorate human – E-technology interaction.
