

UDC 08
LBC 94

Editor: Shibaev Alexander Grigoryevich, *Doctor of Technical Sciences, Professor, Academician*
Scientific Secretary: Kuprienko Sergey, *PhD in Technical Sciences*

Editorial board: More than 240 doctors of science. Full list on pages 3-4

The International Scientific Periodical Journal "*SWorldJournal*" has been published since 2018 and has gained considerable recognition among domestic and foreign researchers and scholars.

Periodicity of publication: Quarterly

The journal activity is driven by the following objectives:

- Broadcasting young researchers and scholars outcomes to wide scientific audience
- Fostering knowledge exchange in scientific community
- Promotion of the unification in scientific approach
- Creation of basis for innovation and new scientific approaches as well as discoveries in unknown domains

The journal purposefully acquaints the reader with the original research of authors in various fields of science, the best examples of scientific journalism.

Publications of the journal are intended for a wide readership - all those who love science. The materials published in the journal reflect current problems and affect the interests of the entire public.

Editorial board

Averchenkov Vladimir Ivanovich, Doctor of Technical Sciences, Professor, Bryansk State Technical University, Russia
 Angelova Polya Georgieva, Doctor of Economic Sciences, Professor, Economic Academy D A Tsenova, Svishtov, Bulgaria, Bulgaria
 Animica Evgenij Georgievich, Doctor of Geographical Sciences, Professor, Ural State University of Economics, Russia
 Antonov Valerij Nikolaevich, Doctor of Technical Sciences, Professor, National Technical University of Ukraine "Kiev Polytechnical Institute", Ukraine
 Antrapceva Nadezhda Mihajlovna, Doctor of Chemical Sciences, Professor, National University of Life and Environmental Sciences of Ukraine, Ukraine
 Ahmadiev Gabdulah Malikovich, Doctor of Veterinary Sciences, Professor, Kazan (Volga) Federal University, Russia
 Bazheva Rima Chamalovna, Doctor of Chemical Sciences, Professor, Kabardino-Balkarian State University named after H M Berbekov, Russia
 Batyrgareeva Vladislava Stanislavovna, Doctor of Law, Research Institute for the Study of Crime Problems named after academician V V Stashisa NAPRN of Ukraine, Ukraine
 Bezdenzhyh Tatyana Ivanovna, Doctor of Economic Sciences, Professor, St Petersburg State University of Economics, Russia
 Blatov Igor Anatolevich, Doctor of Physical and Mathematical Sciences, Professor, Volga State University of Telecommunications and Informatics, Russia
 Burda Aleksey Grigorevich, Doctor of Economic Sciences, Professor, Kuban State Agrarian University, Russia
 Buharina Irina Leonidovna, Doctor of Biological Sciences, Professor, Udmurt State University, Russia
 Bushueva Inna Vladimirovna, Doctor of Pharmaceutical Sciences, Professor, Zaporizhzhya State Medical University, Ukraine
 Bykov Yuriy Aleksandrovich, Doctor of Technical Sciences, Professor, Moscow State University of Railway Engineering, Russia
 Velichko Stepan Petrovich, Doctor of Education, Professor, Kirovograd State Pedagogical University named after Vladimir Vinnichenko, Ukraine
 Vizir Vadim Anatolevich, Doctor of Medical Sciences, Professor, Zaporizhzhya State Medical University, Ukraine
 Vozhegova Raisa Anatolevna, Doctor of Agricultural Sciences, Professor, Institute of Irrigated Agriculture of the National Academy of Agrarian Sciences of Ukraine, Ukraine
 Volgireva Galina Pavlovna, Candidate of Historical Sciences, assistant professor, Perm State University, Russia
 Voloh Dmitriy Stepanovich, Doctor of Pharmaceutical Sciences, Professor, A A National Medical University Pilgrim, Ukraine
 Vorozhbitova Aleksandra Anatolevna, Doctor of Philology, Professor, Sochi State University, Russia
 Gavrilenko Nataliya Nikolaevna, Doctor of Education, assistant professor, Peoples' Friendship University of Russia, Russia
 Georgievskij Gennadiy Viktorovich, Doctor of Pharmaceutical Sciences, senior scientific employee, SE "Ukrainian Scientific Pharmacopoeia Center for the Quality of Medicines", Ukraine
 Getman Anatolij Pavlovich, Doctor of Law, Professor, National Law University named after Yaroslav the Wise, Ukraine
 Gilev Gennadiy Andreevich, Doctor of Education, Professor, Moscow State Industrial University, Russia
 Goncharuk Sergej Mironovich, Doctor of Technical Sciences, Professor, Russia
 Granovskaya Lyudmila Nikolaevna, Doctor of Economic Sciences, Professor, Kherson State Agrarian University, Ukraine
 Grebneva Nadezhda Nikolaevna, Doctor of Biological Sciences, Professor, Russia
 Grizodub Aleksandr Ivanovich, Doctor of Chemical Sciences, Professor, SE "Ukrainian Scientific Center for the Quality of Medicines", Ukraine
 Gricenko Svetlana Anatolevna, Doctor of Biological Sciences, assistant professor, Ural State Academy of Veterinary Medicine, Russia
 Gudzenko Aleksandr Pavlovich, Doctor of Pharmaceutical Sciences, Professor, Lugansk State Medical University, Ukraine
 Demidova V G., candidate of pedagogical sciences, assistant professor, Ukraine
 Denisov Sergej Aleksandrovich, Doctor of Agricultural Sciences, Professor, Russia
 Dorofeev Andrej Viktorovich, Doctor of Education, assistant professor, Bashkir State University, Russia
 Dorohina Elena Yurevna, Doctor of Economic Sciences, assistant professor, G V Russian University of Economics Plekhanova, Russia
 Ermagambet Bolat Toleuanovich, Doctor of Chemical Sciences, Professor, Director of the Institute of Coal Chemistry and Technology LLP, Kazakhstan
 Zhovtonog Olga Igorevna, Doctor of Agricultural Sciences, Institute of Water Problems and Land Reclamation NAAS, Ukraine
 Zaharov Oleg Vladimirovich, Doctor of Technical Sciences, Professor, Saratov State Technical University, Russia
 Zubkov Ruslan Sergeevich, Doctor of Economic Sciences, assistant professor, Nikolaev Interregional Institute for Human Development of the Higher Educational Institution "University of Ukraine", Ukraine
 Irzhi Hlahula, Doctor of Geological and Mineralogical Sciences, Professor, FLKR - T Bati University, Zlín, Czech
 Kalajda Vladimir Timofeevich, Doctor of Technical Sciences, Professor, Tomsk State University, Russia
 Kalenik Tatyana Kuzminichna, Doctor of Biological Sciences, Professor, Far Eastern Federal University, Russia
 Kantarovich Yu L., Ph D in History of Arts, Odessa National Music Academy, Ukraine
 Kapitanov Vasiliy Pavlovich, Doctor of Technical Sciences, Professor, Odessa National Maritime University, Ukraine
 Karpova Nataliya Konstantinovna, Doctor of Education, Professor, South Federal University, Russia
 Kafarskij Vladimir Ivanovich, Doctor of Law, Professor, Director of Science Center of Ukrainian Constitutionalism, Ukraine
 Kirillova Elena Viktorovna, Doctor of Technical Sciences, assistant professor, Odessa National Maritime University, Ukraine
 Kirichenko Aleksandr Anatolevich, Doctor of Law, Professor, Ukraine
 Klimova Natalya Vladimirovna, Doctor of Economic Sciences, Professor, Kuban State Agrarian University, Russia
 Knazeva Olga Aleksandrovna, Doctor of Biological Sciences, assistant professor, Bashkir State Medical University, Russia
 Kovalenko Elena Mihajlovna, doctor of philosophical science, Professor, South Federal University, Russia
 Kovalenko Petr Ivanovich, Doctor of Technical Sciences, Professor, Institute of Water Problems and Land Reclamation of the National Academy of Agrarian Sciences of Ukraine, Ukraine
 Kokebaeva Gulzhauhat Kakenovna, Doctor of Historical Sciences, Professor, Al-Farabi Kazakh National University, Kazakhstan
 Kondratov Dmitriy Vyacheslavovich, Doctor of Physical and Mathematical Sciences, assistant professor, Russian Academy of National Economy and Public Administration under the President of the Russian Federation, Russia
 Kopej Bogdan Vladimirovich, Doctor of Technical Sciences, Professor, Ivano-Frankivsk National Technical University of Oil and Gas, Ukraine
 Kosenko Nadezhda Fedorovna, Doctor of Technical Sciences, assistant professor, Ivanovo State University of Chemical Technology, Russia
 Kostenko Vasiliy Ivanovich, Doctor of Agricultural Sciences, Professor, Ukraine
 Kotlyarov Vladimir Vladislavovich, Doctor of Agricultural Sciences, Professor, Kuban State Agrarian University, Russia
 Kochiney Yuriy Yurevich, Doctor of Economic Sciences, assistant professor, St Petersburg State Polytechnical University, Russia
 Kravchuk Anna Viktorovna, Doctor of Economic Sciences, Professor, Academy of the State Prison Service, Ukraine
 Kruglov Valerij Mihajlovich, Doctor of Technical Sciences, Professor, Moscow State University of Railway Engineering, Russia
 Kuderin Marat Krykbaevich, Doctor of Technical Sciences, Professor, PSU named after S Toraiyrov, Kazakhstan
 Kurmaev Petr Yurevich, Doctor of Economic Sciences, Professor, Uman State Pedagogical University named after Pavel Tychnya, Ukraine
 Kuhar Elena Vladimirovna, Doctor of Biological Sciences, assistant professor, Kazakh Agro Technical University S Seifullina, Kazakhstan
 Lapkina Inna Aleksandrovna, Doctor of Economic Sciences, Professor, Odessa National Maritime University, Ukraine
 Latygina Natalya Anatolevna, Doctor of Political Science, Professor, Kiev National University of Trade and Economics, Ukraine
 Lebedev Anatolij Timofeevich, Doctor of Technical Sciences, Professor, Stavropol State Agrarian University, Russia

Lebedeva Larisa Aleksandrovna, candidate of psychological sciences, assistant professor, Mordevian State University, Russia
 Lipich Tamara Ivanovna, doctor of philosophical science, assistant professor, Belgorod State University, Russia
 Lomotko Denis Viktorovich, Doctor of Technical Sciences, Professor, Ukrainian State Academy of Railway Transport, Ukraine
 Lyukina Larisa Vladimirovna, Doctor of Philology, assistant professor, Russian Academy of National Economy and Public Administration under the President of the Russian Federation, Russia
 Lyalkina Galina Borisovna, Doctor of Physical and Mathematical Sciences, Professor, Perm National Research Polytechnical University, Russia
 Majdanyuk Irina Zinovievna, doctor of philosophical science, assistant professor, National University of Life and Environmental Sciences of Ukraine, Ukraine
 Makarova Irina Viktorovna, Doctor of Technical Sciences, Professor, Kazan (Volga) Federal University, Russia
 Maksin Viktor Ivanovich, Doctor of Chemical Sciences, Professor, National University of Life and Environmental Sciences of Ukraine, Ukraine
 Malahov A V., Doctor of Physical and Mathematical Sciences, Professor, Ukraine
 Mateeva Anna Vasilevna, Doctor of Sociology, assistant professor, Altai State University, Russia
 Melnik Alyona Alekseevna, Doctor of Economic Sciences, assistant professor, Kiev National University of Technology and Design, Ukraine
 Milyaeva Larisa Grigorevna, Doctor of Economic Sciences, Professor, Biysk Technical Institute (branch) "Altai State Technical University named after I I Polzunova", head of the department of business economics, Russia
 Mishenina Tatyana Mihajlovna, Doctor of Education, Professor, Kryvyi Rih State Pedagogical University, Ukraine
 Mogilevska I M., candidate of pedagogical sciences, Professor, Ukraine
 Moiseykina Lyudmila Guchaevna, Doctor of Biological Sciences, Professor, Kalmyk State University, Russia
 Morozov Aleksey Vladimirovich, Doctor of Agricultural Sciences, Professor, Kherson State Agrarian University, Ukraine
 Morozova Tatyana Yurevna, Doctor of Technical Sciences, Professor, Moscow State University of Instrument Engineering and Computer Science, Russia
 Nefedeva Elena Eduardovna, Doctor of Biological Sciences, assistant professor, Volgograd State Technical University, Russia
 Nikolaeva Alla Dmitrievna, Doctor of Education, Professor, Northeast Federal University named after M K Ammosova, Russia
 Orlov Nikolaj Mihajlovich, Doctor of Science in Public Administration, assistant professor, Academy of Internal Troops of the Ministry of Internal Affairs of Ukraine, Department of Operational conquest of the BB, Ukraine
 Otepova Gulmira Elubashevna, Doctor of Historical Sciences, Professor, Pavlodar State Pedagogical Institute, Kazakhstan
 Pavlenko Anatolij Mihajlovich, Doctor of Technical Sciences, Professor, Poltava National Technical University Yuri Kondratyuk, Ukraine
 Parunakyan Vaagn Emilevich, Doctor of Technical Sciences, Professor, Priazov State Technical University, Ukraine
 Patyka Nikolaj Vladimirovich, Doctor of Agricultural Sciences, Professor, National Scientific Center "Institute of Agriculture of NAAS", Ukraine
 Pahomova Elena Anatolevna, Doctor of Economic Sciences, assistant professor, International University of Nature, Society, and Man "Dubna", Russia
 Pachurin German Vasilevich, Doctor of Technical Sciences, Professor, Nizhny Novgorod State Technical University R E Alekseeva, Russia
 Pershin Vladimir Fedorovich, Doctor of Technical Sciences, Professor, Tambov State Technical University, Russia
 Piganov Mihail Nikolaevich, Doctor of Technical Sciences, Professor, Samara State Aerospace University named after academician S P Queen, Russia
 Polyakov Andrej Pavlovich, Doctor of Technical Sciences, Professor, Vinnitsa National Technical University, Ukraine
 Popov Viktor Sergeevich, Doctor of Technical Sciences, Professor, Saratov State Technical University, Russia
 Popova Taisiya Georgievna, Doctor of Philology, Professor, Peoples' Friendship University of Russia, Russia
 Rastrygina Alla Nikolaevna, Doctor of Education, Professor, Kirovograd State Pedagogical University named after Vladimir Vinnichenko, I Shevchenko, Krupytskyi, Ukraine
 Rebezov Maksim Borisovich, Doctor of Agricultural Sciences, Professor, Russia
 Reznikov Andrej Valentinovich, Doctor of Economic Sciences, assistant professor, Moscow State Technological University "Stankin", Russia
 Rokochinskij Anatolij Nikolaevich, Doctor of Technical Sciences, Professor, National University of Water Resources and Environmental Management, Ukraine
 Romashenko Mihail Ivanovich, Doctor of Technical Sciences, Professor, Institute of Water Problems and Land Reclamation of the National Academy of Agrarian Sciences of Ukraine, Ukraine
 Rylov Sergej Ivanovich, PhD in Economics, Professor, Odessa National Maritime University, Ukraine
 Savasheva Nelli Aleksandrovna, Doctor of Economic Sciences, Professor, Sochi State University, Russia
 Safarov Artur Mahmudovich, Doctor of Philology, Senior Lecturer, Russia
 Svetlov Viktor Aleksandrovich, doctor of philosophical science, Professor, Petersburg State University of Railway Engineering, Russia
 Semencov Georgij Nikiforovich, Doctor of Technical Sciences, Professor, Ivano-Frankivsk National Technical University of Oil and Gas, Ukraine
 Sentyabrev Nikolaj Nikolaevich, Doctor of Biological Sciences, Professor, Volgograd State Academy of Physical Culture, Russia
 Sidorovich Marina Mihajlovna, Doctor of Education, Professor, Kherson State University, Ukraine
 Sirota Naum Mihajlovich, Doctor of Political Science, Professor, State University of Aerospace Instrumentation, Russia
 Smirnov Evgenij Ivanovich, Doctor of Education, Professor, Yaroslavl State Pedagogical University named after K D Ushinsky, Russia
 Sokolova Nadezhda Gennadevna, Doctor of Economic Sciences, assistant professor, Izhevsk State Technical University, Russia
 Starodubcev Vladimir Mihajlovich, Doctor of Biological Sciences, Professor, National University of Life and Environmental Sciences of Ukraine, Ukraine
 Stegnij Vasiliy Nikolaevich, Doctor of Sociology, Professor, Perm National Research Polytechnical University, Russia
 Stepenko Valerij Efremovich, Doctor of Law, assistant professor, Pacific State University, Russia
 Stovpce Olexsandr Vasilevich, Doctor of Philosophy, assistant professor, Odessa National Maritime University, Ukraine
 Stovpce Vilas Grigorovich, Candidate of Philology, assistant professor, Odessa National Maritime University, Ukraine
 Strelcova Elena Dmitrievna, Doctor of Economic Sciences, assistant professor, South Russian State Technical University (NPI), Russia
 Suhenko Yuriy Grigorevich, Doctor of Technical Sciences, Professor, National University of Life and Environmental Sciences of Ukraine, Ukraine
 Suhova Mariya Gennadevna, Doctor of Geographical Sciences, assistant professor, Gorno-Altai State University, Russia
 Tarariko Yuriy Aleksandrovich, Doctor of Agricultural Sciences, Professor, Ukraine
 Tarasenko Larisa Viktorovna, Doctor of Sociology, Professor, South Federal University, Russia
 Testov Boris Viktorovich, Doctor of Biological Sciences, Professor, Tobolsk Integrated Scientific Station, Ural Branch of the Russian Academy of Sciences, Tobolsk, Russia
 Tokareva Natalya Gennadevna, Candidate of Medical Sciences, assistant professor, Medical Institute FSBEI HE "Moscow State University named after NP Ogarev, Russia
 Tolbatov Andrej Vladimirovich, candidate of technical sciences, assistant professor, Sumy National Agrarian University, Ukraine
 Tonkov Evgenij Evgenievich, Doctor of Law, Professor, Law Institute of the National Research University Belgorod State University, Russia
 Trigub Petr Nikitovich, Doctor of Historical Sciences, Professor, Kazakh
 Tungushbaeva Zina Bajbagusovna, Doctor of Biological Sciences, Kazakh National Pedagogical University named after Abay, Kazakhstan
 Tuzhenko Sergej Anatolevich, Doctor of Technical Sciences, assistant professor, Nikolaev State University named after V O Sukhomlinsky, Ukraine
 Fateeva Nadezhda Mihajlovna, Doctor of Biological Sciences, Professor, Tyumen State University, Russia
 Fatyhova Alevtina Leontevna, Doctor of Education, assistant professor, Bashkir State University (Sterlitamak branch), Russia
 Fedorishin Dmitro Dmitrovich, Doctor of Geological and Mineralogical Sciences, Professor, Ivano-Frankivsk National Technical University of Oil and Gas, Ukraine

Fedotova Galina Aleksandrovna, Doctor of Education, Professor, Novgorod State University, Russia
 Fedyanina Lyudmila Nikolaevna, Doctor of Medical Sciences, Professor, Far Eastern Federal University, Russia
 Habibullin Rifat Gabdulhakovich, Doctor of Technical Sciences, Professor, Kazan (Volga) Federal University, Russia
 Hodakova Nina Pavlovna, Doctor of Education, assistant professor, Moscow City Pedagogical University, Russia
 Hrebina Svetlana Vladimirovna, Doctor of Psychology, Professor, Pyatigorsk State Linguistic University, Russia
 Chervonij Ivan Fedorovich, Doctor of Technical Sciences, Professor, Zaporizhzhya State Engineering Academy, Ukraine
 Chigirinskaya Natalya Vyacheslavovna, Doctor of Education, Professor, Volgograd State Technical University, Russia
 Churekova Tatyana Mihajlovna, Doctor of Education, Professor, Russia
 Shajko-Shajkovskij Aleksandr Gennadevich, Doctor of Technical Sciences, Professor, Chernivtsi National University Y Fedkovich, Ukraine
 Shapovalov Valentin Valerevich, Doctor of Pharmaceutical Sciences, Professor, Kharkov Medical Academy of Postgraduate Education, Ukraine
 Shapovalov Valerij Vladimirovich, Doctor of Pharmaceutical Sciences, Professor, Kharkiv Regional State Administration, Ukraine
 Shapovalova Viktorja Aleksievna, Doctor of Pharmaceutical Sciences, Professor, Kharkov Medical Academy of Postgraduate Education, Ukraine
 Sharagov Vasilij Andreevich, Doctor of Chemical Sciences, assistant professor, Balti State University "Alecu Russo", Moldova
 Shevchenko Larisa Vasilevna, Doctor of Veterinary Sciences, Professor, National University of Life and Environmental Sciences of Ukraine, Ukraine
 Shepitko Valerij Yurevich, Doctor of Law, Professor, National Law University named after Yaroslav the Wise, Ukraine
 Shibaev Aleksandr Grigorevich, Doctor of Technical Sciences, Professor, Odessa National Maritime University, Ukraine

Abstract. *On the basis of the analysis of the potential of digital technology, the article describes the experience of using digital technology in the process of training of future teachers in the context of updating the content of education. Students' use of mobile devices and apps in university practice has been studied. An example of a section of the professional methodology lesson presents the peculiarities of the use of a number of online apps in the process of training of future teachers. Using the MindMaps method with online tools Bubbl.us and Flinga, the term "digital education" is formulated. The basic characteristics of the modern teacher are distinguished: the ability to motivate, to be a competent person, to have leader's qualities. The potential of digital technologies is leading to innovations in teaching methods of school subjects, which requires finding new methodological approaches and updating teaching methods. An example of students' applying of BYOD technology while doing practical tasks using the Mindmaps method is presented. Based on the experience of using online apps, the results of students' choice of test programs considered optimal for further use in professional activity are described. Digital technologies are considered to be effective tools for the teacher, which increase students' interest in learning teaching methods and form their subject competences. Findings of the final survey among students helped to compile methodological recommendations as for the use of digital technologies at the lesson. Future teachers have the opportunity to acquire relevant knowledge, practical training for further professional activity. The authors did not attempt to analyse all the available digital technologies and apps. Since there are a great number of them, an attempt was made to distinguish digital technologies and apps according to the ways of their use: motivation, extension of reality during the study of new material, use of didactic simulations, infographics; conducting formative assessment, development of tests; carrying out final evaluation.*

Key words: *digital technology; training of modern teachers; digital competence; cloud technologies*

Introduction.

The principles of the New Ukrainian School's educational process structure pre-determine its transformation, which shifts the role of the subject teacher as a carrier of knowledge to the teacher, that creates optimal conditions for students to help them acquire key competencies, motivate them to take action in order to create new knowledge for life. Digital learning technologies are called to help with this transformation of the educational process. One of these technologies is mobile-based e-learning.

The use of mobile devices in education is taking place in many developed countries. The use of mobile apps enables students to gain controlled access to educational content and allows the teacher to manage the educational process with the control over its effectiveness. The search for new methodological approaches to the organization of the educational process in higher educational institutions, taking into account the opportunities of digital technologies, is becoming urgent.

In order to improve the digital competence of future teachers by means of introduction of digital technologies to the educational process, we studied the state-of-the-art of the use of mobile devices and apps in university practice by conducting a survey among the students of higher educational institutions: Borys Grinchenko Kyiv University, National Pedagogical Dragomanov University, Pavlo Tychyna Uman State Pedagogical University. It gave the possibility to find out what mobile tools and apps can be used in the classroom without additional training. This survey gave an idea of the extent to which digital technologies can be used for information search by the students and their indirect use in educational process.

Figure 1 presents the results of the survey among 3rd year students (112 respondents), as to what apps and services they use on mobile devices?

1. Browser.
2. Mail client.
3. Instant messaging client (Viber, Hangouts, Telegram, etc.)
4. Calendar (organizer).
5. Cloud service programs (Dropbox, Google Drive, etc.).
6. Apps for social networking (Facebook, Twitter, etc.).
7. E-book reader (FBReader, CoolReader, EbookDroid, Play Books and more).
8. Office programs (analogues of Word, Excel, etc.).
9. Dictionaries and translators (including online translators).
10. Games.

Figure 1 - The use of digital technologies by the students of pedagogical specialties

The survey shows that office programs, dictionaries and translators, messengers and browsers as well as calendar are most commonly used on mobile devices. The students are much less likely to use e-book readers, games, and cloud service

programs (Dropbox, Google Drive, etc.). Such students' interest in the use of digital technologies gives grounds to considering them promising in educational activity, in particular for the training of future teachers.

Main text.

Today, there are many available digital educational technologies. However, the way of their use in the process of future teachers' training remains under researched.

Problem statement: presentation of the results of the study of the possibilities of using digital technologies in training of future teachers in the context of modernization of the content of education and description of methods of the use of digital technologies in higher educational institutions in the process of future teachers' training.

Analysis of Publications The problem of digital competence is revealed in the works of N. Bakhmat [9], V. Bykov [1], A. Gurzhiy [10], L. Kartashova [9], V. Lapinskiy [12], N. Morze [13], O. Spirin [11], and others.

Researchers [1], [5], [13], who have investigated the use of digital technologies in addition to positive assessment of their effectiveness point out risks that may reduce the effectiveness of their use in education.

Paul A. Kirschner points out that there are three widespread myths that hinder the effective use of digital technologies in the educational process: modern generation is able to learn with modern mobile devices; each student has his/her own learning style; students should be allowed to determine where and when to study autonomously [7]. The youth are good at using mobile devices for consumer and gaming purposes, but have significant difficulties in using them for educational purposes.

Discussion

We are presenting an example of a section of an introduction to professional methodology lesson that demonstrates the use of digital technology in the training of future teachers in higher educational institution. During the class, we will analyse some digital technologies that, in our opinion, will be an effective tool in the hands of the teacher to increase the interest of students to study the discipline and to form their subject competences.

At the acquaintance (introduction) stage, we use the interactive "Icebreaker" exercise, the goal of which is to compare ourselves (associations) with new technologies: a digital device (desktop, smartphone, laptop, smart watch, fax, push-button phone, media, etc.) for setting up group members to active work, increasing motivation to learn new material, contributing to a relaxed atmosphere in the classroom. We then invite students to indicate their emotions with the help of ExitPoll tool by ClassroomScreen.com. Thus we see the general psychological mood of the group at the beginning of the class. At the end of the class we once again check the mood of students and see the impact of the use of digital technologies on the emotional state of students.

After analyzing the emotional state of students, we use the exercise "Incomplete Sentence" to find out what students expect from this class. To do this exercise quickly, we use the Menti.com application, where we formulate the task to continue the sentence, "I expect this course ...".

We have the following answers:

New knowledge that will be useful for professional and personal development, the use of new programs, the use of digital technologies for formative assessment of students, professional development, digital tools for teachers to create educational dimension, etc.

Figure 2 - Students’ motivational aims at the beginning of the class

Rationale for the relevance of the proposed topic. Student training is conducted according to the DigComp 2.0 standard, which identifies the main components of digital competence in 5 areas: 1) information and digital data; 2) communication and cooperation; 3) creation of digital content; 4) security; 5) solving problems [4].

Together with students using the method MindMaps as well as online tools Bubbl.us and Flinga we formulate the definition of “digital education”. It is the education, the functionality of which is digital technologies implemented in the Internet.

At the same time, we found out what a modern lesson with digital technology should be like, and therefore what a modern teacher should be like. We also distinguish the basic features of a modern teacher (Bubbl.us).

The most important feature of a modern teacher:

- 13% - able to motivate to study;
- 9% - competent person;
- 7% - has leader’s qualities;
- 3% - uses digital technologies;
- 1% - educates students and knows his/her subject.

Figure 3 - Basic features of a modern teacher by students

From the analysis of the results of the students' survey (Figure 3), we have identified the main features of a modern teacher: the ability to motivate, be a competent person, have leader's qualities. Based on the distinguished characteristics of a modern teacher, we emphasize the importance of its adaptation to new digital technologies in the context of the so-called flexible skills, the essence of which lies in the fact that due to the rapid emergence of various digital technologies, the modern student, after initial education, may obtain such a profession, which has not yet been created.

Future teachers should understand that learners should not be forbidden to use gadgets, but they should use them for educational purposes. Modern gadgets are attractive to students, so prohibitions cannot solve the problem. It will be more effective to direct such curiosity toward learning.

My attitude towards using gadgets by students on the lesson

Figure 4 - Results of the teachers' and students' questionnaire as for the suitability of the use of gadgets in the classroom

The potential of digital technologies is leading to innovations in the teaching methods of school subjects, and that requires finding new methodological approaches and updating the methodology of their use. One of the options for implementing this approach is digital technology Bring your own device (BYOD) [3].

Here is an example of using BYOD technology during practical tasks using the method Mindmaps.

Mindmaps help organize and classify information received, think effectively, memorize, remember, solve creative tasks, and be able to visualize and express internal processes of information processing, make changes, refine them.

In our work we use online apps to create Mindmaps, such as: MindMeister, Bubbl.us, Mind 42, Spiderscribe. While doing practical tasks, students in groups characterize the programs they have worked with and evaluate them for their ease of use as a teacher and as a student. A screenshot or link to the work report is uploaded to the Padlet online board, indicating their group data. The criteria for evaluating online apps are: publicity, intuitive interface, accessibility, brightness of the map, the ability to save and upload to the storage device.

The analysis of program ratings shows that Bubbl.us is the easiest app to use while MindMeister has a bright set of schema elements. Mind 42 is giving trouble registering, and the free version of Spiderscribe lets you create only black and white maps.

Another effective educational tool is Flinga, which makes it easy to create online co-working environments. It was created by Finnish developers. There are two environments to choose from: the Flinga Wall and the Flinga Whiteboard. Direct

link, input code and QR code are provided for sharing.

Figure 5 - The outlook of the report uploaded to the Padlet online board

Possibilities of using Flinga in the educational process are as follows: to activate the acquired knowledge at the beginning of the class; to formulate students’ questions during seminar or lecture and follow-up answers; to brainstorm related to task solution search ideas.

One of the basic forms of work at the seminar is to monitor existing online apps for test creation and testing. The students, after using online apps, made the choice of the test programs that they considered appropriate for further use in their professional activities. The following online apps have been proposed for monitoring: Google forms; Kahoot; Triventy; LearningApps; Menti.com; Plickers; Quizlet; Online test drop; Formative; Socrative (112 respondents):

Figure 6 - Chart reflecting the results of the analysis of online test programs

From the chart, we found out that three online knowledge assessment apps, such as LearningApps, Kahoot and Plickers, are the best (over 15 likes). These apps have their own peculiarities related to the differences in their use.

Kahoot is an app designed for quick survey of elementary school students, it has a bright interface, requires mobile devices from respondents.

LearningApps has many options for creating tests, a ready-made library of tasks and the possibility to create classes (conducting formative assessment).

Plickers has similar features, except for the ready-made task library. In addition, its main advantage over LearningApps is that it is only necessary for the teacher to have mobile device, the students get cards with Q-codes. It is reasonable to use Plickers during: a front-end poll (lesson); a front-end poll at the beginning of the lesson; A /B - material presentation testing; conducting tests / final assessment; analysis of the teacher's work in dynamics.

Studying the methodological features of the use of digital technologies by future teachers is an optimal prerequisite for creating a modern educational environment that will help students acquire key competences, motivate them to take action to create new knowledge.

Results of the Research.

After a series of seminars, students undergo module control. It provides questionnaires in order to determine the best digital technologies and apps for teaching purposes in further pedagogical activities.

Basic questions of the questionnaire:

1. How many programs should be used during the lesson?
2. What digital tools do you use when updating knowledge?
3. What digital tools do you use when explaining new material?
4. What digital tools do you use when consolidating the material studied?
5. Which online test apps are useful for formative assessment of students?
6. What educational platforms will help a teacher prepare for the lesson?

Based on the results of the questionnaire, we have developed guidelines for teachers as for the use of digital technology in the lesson.

1. The optimal number of online apps for use in the lesson should be limited to three.
2. It is reasonable to use Flinga app when updating knowledge.
3. At the stage of learning new educational material we use MindMaps, presentations, infographics, etc.
4. During consolidation of the material studied and formative evaluation, we use online test programs.
5. Platforms to help the teacher prepare for the lesson are: Canva, Lesson, Educaplay and more.

So, in a modern lesson, a teacher uses presentations, infographics, online whiteboard, extension of reality, online tests, videos, and more. Using the following tools and technologies, a teacher can:

- motivate students using presentations (Google Slides, Prezi, Libre Office Impress, Power Point and others), video programs (Biteable, Sanva, Powtoon, Pixton, Toondoo, etc.);
- when learning new material, use extension of reality (Classroom, WallaMe), use simulations (Go-Lab), online boards (Padlet; MindMeister, bubbl.us), use infographics (easel.ly, Visual.ly, etc.);
- conduct formative assessment, create tests (LearningApps, Kahoot, Quizlet, etc.);
- conduct final assessment by means of on-line tests using Q-codes: Plickers.

Summary and conclusions.

The suitability of the use of digital technologies in the training of future teachers is conditioned by the tendency of restructuring the educational process in accordance with the Concept of the New Ukrainian School and taking into account modern innovations in the field of providing educational services.

These technologies and apps allow to organize effective learning of information technologies with increasing interest of students, as well as to form their educational, informational, experimental, research and professional competences.

We did not attempt to analyse all the available digital technologies and apps. Since there are so many of them, we tried to distinguish them according to the variants of their use: motivation, extension of reality during the study of new material, use of didactic simulations, infographics; conducting formative assessment, development of tests; carrying out final evaluation.

Digital technologies can greatly enhance the learning process, but it requires a legal framework in order to regulate the share of use of digital devices in educational institutions. Otherwise, they create additional problems that may pose the question of the quality of the knowledge gained. It also necessitates a sound strategy for the introduction of digital technologies into the educational process, taking into account current legislation.

Abstract. У статті на основі аналізу можливостей цифрових технологій описаний досвід їх використання в процесі підготовки майбутніх учителів в умовах оновлення змісту освіти. Вивчено стан використання студентами мобільних пристроїв і застосунків в університетській практиці. На прикладі фрагменту заняття з фахової методики представлено методичні особливості застосування низки онлайн додатків у процесі підготовки майбутніх учителів. За допомогою методу MindMaps з онлайн інструментами Bubbl.us та Flinga, сформульовано означення поняття «цифрова освіта». Виокремлено базові ознаки сучасного вчителя: вміння мотивувати, бути компетентною особистістю, мати лідерські якості. Можливості цифрових технологій призводять до новацій в методиці навчання шкільних предметів, що потребує пошуку нових методичних підходів та оновлення методики їх навчання. Представлено приклад застосування технології BYOD під час виконання студентами практичних завдань із застосуванням методу Mindmaps. На основі досвіду використання онлайн додатків, здійснено опис результатів вибору студентами оптимальних на їх думку тестових оболонок для подальшого використання у професійній діяльності. Розглянуто цифрові технології, як ефективні інструменти викладача, що підвищують інтерес студентів до вивчення фахових методик та формуватимуть у них предметних компетентностей. За результатами підсумкового анкетування серед студентів створено методичні рекомендації з використання цифрових технологій на уроці. Майбутні вчителі мають можливість отримати відповідні знання, практичну підготовку для подальшої професійної діяльності. Автори не намагалися розглянути усі наявні цифрові технології та додатки. Оскільки їх існує дуже багато, була здійснена спроба їх виокремлення за варіантами застосування: мотивація, доповнення реальності при вивченні нового матеріалу, використання дидактичних симуляцій, інфографіка; проведення формувального оцінювання, створення тестів; проведення підсумкового оцінювання.

Ключові слова: цифрові технології, підготовка сучасного вчителя, цифрова компетентність, хмарні технології.
