The assessment of individual work is carried out by the following *criteria*:

- 1) understanding, the degree of the theory and methodology of the problems under consideration;

- 2) the degree of mastering of the facts description being studied;
- 3) the acquaintance with the basic and additional literature recommended;
- 4) the ability to combine theory with practice when considering specific situations, solving the tasks presented for an individual study, and the tasks presented for the consideration in the classroom;
- 5) logic, structure, style of presentation of the material in the written works and during the performances in the classroom, the ability to substantiate their position, to generalize information and draw conclusions.

6.3. The Forms of Module Control Implementation, and the Criteria of Evaluation

The Implementation of Module control works is done individually by each student in electronic form and attached to the e-course or delivered in print.

Module control work is carried out after studying a specific contents module. It is assessed for completing tasks in the form specified by the lecturer program.

Module control *forms* are the implementation of module control works that provide answers to several types of test questions and, in some cases, thorough the disclosure of several questions formulated as open-ended questions from module material. The number of module test works in the course is 4, each work implementation is mandatory.

Evaluation criteria:

- 1) understanding, the degree of mastering of the theory and methodology of the problems under consideration;
- 2) the degree of mastering of the actual material being studied;
- 3) the acquaintance with the basic and additional sources recommended;
- 4) the ability to present the examples of modern advertising and public relations practice, to illustrate theoretical provisions with practical examples;
- 6) logic, structure, style of presentation in the written work, the ability to substantiate their position, to generalize information and draw conclusions.
- 7) completeness of the answer to the questions, quality and independence, creativity, initiative in accomplishing the task.

When evaluating module control work, the volume and correctness of the tasks performed are taken into account. The correct performance of all tasks is estimated at a maximum of 25 points.

6.4. The Forms of Semester Control and the Criteria of Evaluation

Semester control is the result of studying each module, which contains a summary of all forms of current control and performance of the module control work. Semester control includes the points for the student's current work at seminars, individual work, Module control work. Semester control of students' knowledge is carried out after the completion of the study of the academic discipline material. The format of the exam passing is a test.

6.5. Indicative List of Thematic Issues for Exam Testing

History of Advertising

1. Make a comparative analysis of the history of two types of advertising in Ukraine: printed ad and TV ad.
2. Analyze the activities of the main sales houses in Ukraine (from the past to present), compare it with the peculiarities of the emergence, development, and management of one of the first sales houses — "Video International" (Відео ІНТЕРНЕСНЛ).
